

The unique point of Bello Bamboo is...

## Our Manifestation

*"Bamboo is the keystone for  
building sustainable community"*

- **Bamboo is the most renewable, abundant and ever growing resource.** It can outperform any other resource in any other way. It provides stronger ecological buildings and products. It provides most of our living needs and it can be harvested each year for at least 100 years. It relieves the pressure of wood and mined materials that do not renew as fast as they are being used.
- **Bamboo connects us again to the natural sustainable cycle of existence.** By working again with a natural resource such as Bamboo, feeling the benefits of being in nature while creating local and cottage industries, we support our community to nurtures ourselves and our families.
- **Bamboo literally 'builds' community.** In a practical, diverse way, we can build a house, make products, create infrastructure that frees us from the need to rely on external influences for our food, water and shelter, making us an empowered & thriving - sustainable community.
- **Bamboo is the solution and model for a 'balanced earth'.** We know the problems of our earth, and Bamboo and its value when manifested in our community can be a model of solution for the outer world. Our cottage industry, plantations and systems can be shared with the world. Our farmers and artisans can have a larger market if they so choose. People can come take a refreshing break in the 'Bello' oasis and be inspired to return to their homes with practical and sustainable solutions. Our western friends can find a completely different cultural way to live, love, learn and work. Our eastern friends can see westerners choosing alternatives to our current 'over-consumption' culture that so impacts their own forests and resources.

## Our Path

- We support, co-create and initiate ideas to realise the above together.
- We have honest open discussions and agreements to be self-responsible as we create and realise this vision.
- We balance concept and practicality ensuring we 'just do it' - even if 'little by little'.
- We are creative in our exchange of time, money and resources expanding the limitation of capital payment to embracing community bartering and other ways.

*Feel free to challenge the bold statements above.  
We have proven research and facts to support our bold claims!*

*Love & Light,*

*The Bello Bamboo Team*
